

PIP Installation

- <https://pypi.org/project/pip/>
- Click Installation
- Scroll Down and you will see “get-pip-py” link
- Open that link
- Save it in the desktop
- Now go to Desktop and double click and run it
- Open CMD prompt
- Type pip and enter and it will recognize pip
- Now type ‘pip install requests’ and it will download and install (as an example)
- Also you can verify typing ‘pip –version’ + Enter and will display the pip version
